

Uccello Marketing Pty Ltd (Uccello) is committed to making people's lives easier by providing elegant assistive technology.

The ADAPT (**www.adaptbydesign.com.au**) methodology shall be utilised as the Environmental Management System and will be integrated within all of Uccello's business processes.

OUR VISION

To improve the environment where we operate and conduct business by fostering partnerships with businesses, community leaders and our neighbors to create a cleaner, safe place to live and work. To achieve this we will:

- minimise the short and long term impact of our activities on the environment and local communities through responsible environmental sustainable management within design, planning, manufacturing, delivery and operation;
- promote a positive culture through implementing initiatives that foster sustainable innovation; and
- optimise our products to relentlessly improve our environmental sustainability performance and improve the sustainable use of natural resources.

OUR OBJECTIVES

To achieve our vision, we shall;

- comply with all relevant environmental legislation, and appropriate industry guidelines, standards and requirements specified by our customers and regulatory agencies;
- implement, maintain and evaluate the performance, effectiveness of the environmental management system and integrate the requirements throughout the overarching operational systems;
- establish, monitor and review environmental sustainability objectives and targets to achieve continual improvement of our environmental sustainability performance;
- implement effective work practices and controls to identify, evaluate and mitigate adverse environmental risk of our work activities, taking all practical steps to prevent pollution and protect biodiversity and ecosystems; striving to minimise the impact on local communities;
- drive innovation to address climate change mitigation and adaptation through reducing our energy and greenhouse gas emissions intensity;
- procure goods and services to minimise environmental risk and maximise environmentally sustainable opportunities which benefits the total life cycle of our product.
